SUMMARY

Final-year B.Tech CSE student with hands-on experience in Machine Learning, Deep Learning, Computer Vision, Image Processing, and NLP. Built and deployed multiple AI-powered applications end-to-end — from model training to production. Proficient in Python and core ML libraries. Participated in Google AI Hackathon, Mumbai. Certified in Anthropic Claude API and Model Context Protocol.

SKILLS

AI / ML: Machine Learning, Deep Learning, CNN, Image Classification, Image Processing, Computer Vision, NLP, Data Preprocessing, Feature Engineering

Libraries: OpenCV, MediaPipe, spaCy, PyMuPDF, Pandas, NumPy, Scikit-learn, Streamlit

Languages: Python, Java, JavaScript, C, C++

Tools: Git, GitHub, Google Colab, Jupyter Notebook, Vercel, Render

Web / Deployment: FastAPI, React.js, REST APIs

Databases: MongoDB, SQL

INTERNSHIP EXPERIENCE

Python Development Intern — Python Development

Dec 2025 – Mar 2026

- Built and evaluated Machine Learning classification models using Scikit-learn; used Pandas and NumPy for data preprocessing, feature engineering, and analysis.
- Deployed trained ML models as Streamlit web applications using Google Colab and Jupyter Notebook.

Python with Django Intern — BrainyBeam Technology Pvt. Ltd.

Sep 2022 – Oct 2022

- Built Python backend applications with Django; gained experience in API design applicable to ML model serving.

Java Intern — Computer Link Education, Mandvi, Gujarat

Jul 2023 – Aug 2023

- Completed core Java and OOP internship; strengthened programming fundamentals used in AI/ML pipeline development.

PROJECTS

Hand Gesture Control — Real-Time CV Pipeline

[GitHub →](#)

Python, OpenCV, MediaPipe, Computer Vision, Image Processing, Real-Time Inference

- Engineered a real-time Image Processing pipeline: captured live video frames with OpenCV, detected 21 hand landmarks per frame using MediaPipe Hands, and classified landmark geometry into gesture classes.
- Mapped output to 21 distinct system commands from approximately 15 physical gestures — a complete perception-to-action AI pipeline.

Cats vs Dogs Image Classifier

[Live Demo →](#)

Python, Deep Learning, CNN, Image Classification, Streamlit

- Built an end-to-end CNN image classification pipeline: image preprocessing, model training, and inference; deployed as an interactive Streamlit web application.

AI Resume Analyzer

[Live Demo →](#)

Python, FastAPI, NLP, spaCy, PyMuPDF, React.js, REST API, Vercel, Render

- Built an NLP pipeline using PyMuPDF for PDF text extraction and spaCy for entity recognition, skill extraction, and ATS scoring; served via FastAPI REST API.
- Implemented a job-description matching endpoint that computes keyword overlap and surfaces missing skills.

Smart Attendance System

[Live Demo →](#)

Python, Deep Learning, Face Recognition, React.js, Node.js, Express.js

- Integrated a deep learning face recognition model for automated identity matching and attendance logging.

Personal Portfolio Website

[Live Demo →](#)

React.js, Vite, Tailwind CSS, Vercel, CI/CD

- Built and deployed a responsive SPA via automated CI/CD pipeline (Git → GitHub → Vercel).

CERTIFICATIONS

Model Context Protocol: Advanced Topics — Anthropic

2026

Introduction to Model Context Protocol — Anthropic

2026

Claude with the Anthropic API — Anthropic

2026

EDUCATION

B.Tech in Computer Science & Engineering — Asha M. Tarsadia Institute

2024 – 2026 (Expected)

CGPA: 8.50 | Google AI Hackathon Participant

Diploma in Computer Engineering — NG Patel Polytechnic (GTU)

2021 – 2024

CGPA: 7.88

10th Board — Vasishtha School

2021

Percentage: 76.00% | Percentile Rank: 86.71
